

safecolours: Colourblind friendly colours

Martin Trapp

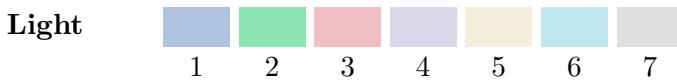

December 12, 2025

1 Colours

Colours are available through: `scBlue` (blue), `scGreen` (green), `scRed` (red), `scPurple` (purple), `scYellow` (yellow), `scCyan` (cyan), and `scGrey` (grey).

The default colour palette is Tol. This can be changed by passing an option to the package, e.g., `\usepackage[light]{safecolours}` for the Light colour palette.

Alternatively, one can access the individual colour palettes directly using:
`solin-colour1`, ..., `solin-colour7`,
`light-colour1`, ..., `light-colour7`,
`wong-colour1`, ..., `wong-colour7`, and
`tol-colour1`, ..., `tol-colour7`.

2 Sources

Colours are compiled from the following sources: Wong & Light colours:
<http://mkweb.bcgsc.ca/colorblind/palettes.mhtml>, Tol colours: <https://personal.sron.nl/~7Epault/>
